# From 'paradigm wars' to 'paradigm peace'?

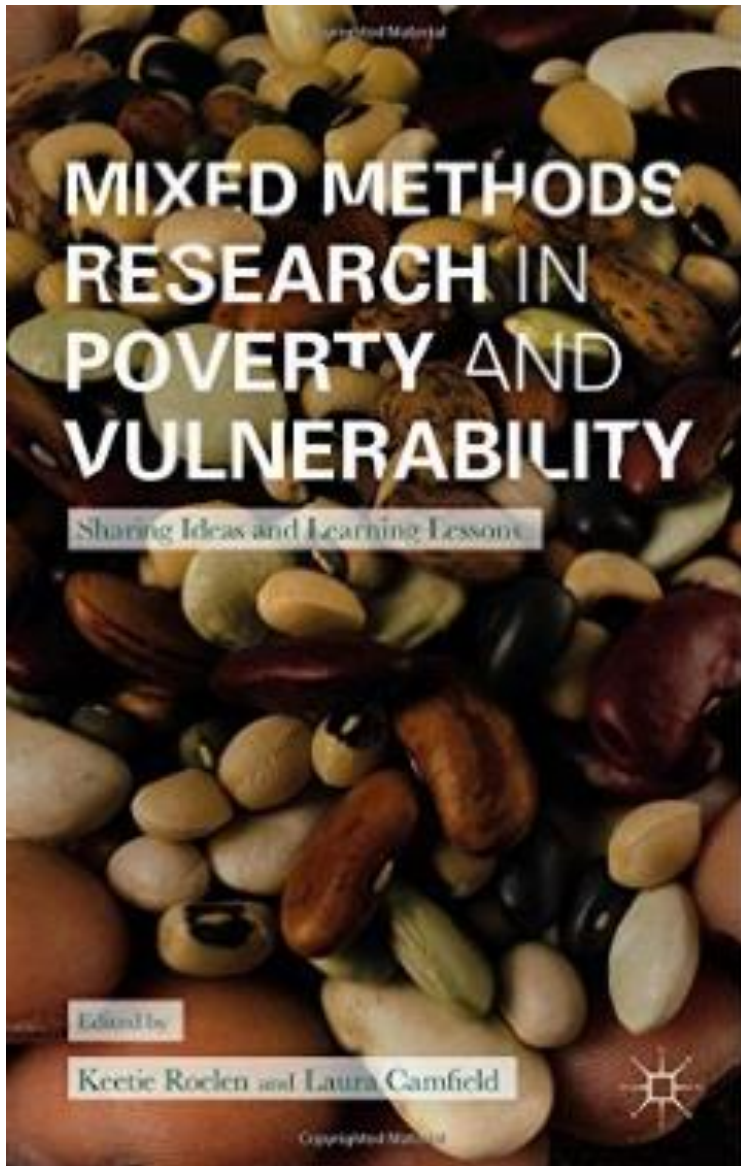

RESEARCHERS OF THE FUTURE: 21ST  
CENTURY APPROACHES FOR EFFECTIVE,  
GLOBAL RESEARCH

# Key points

- Multi, inter, trans or post-disciplinary?
  - What are the differences? Is post-disciplinary better?
    - Not necessarily – different disciplines working together in an interdisciplinary way can be stronger if they engage in mutual and self critique
- Types of problem – simple, complex, complicated, all of the above...?
  - Few research problems are simple, as the slide shows, and even these problems can have complicated or complex aspects
- Disciplinary socialisation and value systems
  - For example, the place of the individual or the context, how you work with others, the extent to which you believe data is constructed

Book:

Mixed Methods Research in  
Poverty and Vulnerability:  
Sharing Ideas and Learning  
Lessons

Keetie Roelen & Laura Camfield  
(26 August 2015)

Book Launch:
