

# Girls' education programmes in the ASEAN region

*Kate Sims and Sarah Thuo*  
*Education Development Trust*  
*28 October 2020*

## Overview and area of study

*This non-standard research exercise identified and mapped girls' education programmes and interventions across Asia and the Pacific. The study primarily focused on interventions that benefit girls, including those that support the transition to secondary school and school completion. The following areas of technical and thematic focus were of particular interest:*

- *Accelerated learning*
- *Girls' education post-Covid-19*
- *Non-formal education*
- *Supplementary education*
- *Female empowerment (i.e. girls' clubs, life skills programmes, economic empowerment)*
- *Climate change*
- *Education Technology (EdTech)*
- *Inclusion of the most marginalised*

# 1. Methodology

This mapping study follows a K4D report outlining key barriers to girls' education in the ASEAN and Pacific region (Price, 2020). It included active programmes and those that finished between 2015 and 2020, with a particular focus on programmes in Cambodia, Laos, Viet Nam, Myanmar, Indonesia, the Philippines, East Timor (Timor-Leste) and Papua New Guinea.

Three days of researcher time was allocated to this study, so the exercise was therefore limited in identifying and mapping a large number of applicable programmes. The study relied on publicly available information, so may not have captured all relevant current and previous programming.

This mapping study searched a variety of publicly available evidence repositories, donor and NGO websites using the terms "girls" or "gender" to highlight relevant studies or programmes. These included, but were not limited to:

Evidence repositories	Donor agencies	Non-government organisations
EGER, the Population Council's resource on gender and education 3ie Poverty Action Lab Cambell Collaboration	UN Agencies (including UNICEF, UNESCO, UNGEI, UN Women) US Aid The World Bank The Asian Development Bank The Australian Department of Foreign Affairs and Trade (DFAT) Norad Agence Française de Développement (AFD) Federal Ministry of Economic Cooperation and Development (Germany) and GIZ Japan International Cooperation Agency (JICA)	Save the Children Plan International CARE International ActionAid BRAC

Source: Author's own

This report accompanies an excel document that details the programmes identified in this mapping study. The excel sheet outlines, where available, the programme's: name, country and region, target population, education sub-sector, whether it clearly covers areas of interest noted above, primary area of intervention, secondary area of intervention, other details, whether the programme targets system-level change, indication of impact, cost and scale, and the links to the documents that were used. In general, available programme-level information online had a

tendency to be high-level and generic. Therefore, some important programme-level information, including for example on scale and impact, were omitted. A total of 49 programmes were identified.

## 2. Summary and observations

**This study found few large-scale targeted programmes for primary and secondary-aged girls in the ASEAN region.** However, this does not mean that other identified programmes were gender-blind. Most of the large scale education programmes have a clear gender lens with gender-responsive activities, and monitoring evaluation and learning indicators focused on gender and other causes of vulnerability. The majority of programmes did not seem to acknowledge different identities within gender, including for example LGBT+ beneficiaries.

**The biggest funders of gender-responsive education programmes in the region seemed to be the World Bank, ADB and DFAT.** 15 programmes that were identified that were funded by these organisations. These programmes targeted all countries in focus for this study.

**More programmes in Cambodia were identified compared to other countries included in this study.** A total of 12 programmes were identified in Cambodia. The majority of these programmes focussed on improving access to education services (primary, secondary and TVET).

**Programmes seeking to address the impact of the Covid-19 pandemic on girls' education were identified in the Philippines, Indonesia, Viet Nam and Laos, the majority of which are implemented by UNICEF.** In the Philippines and Viet Nam, numerous programmes are being implemented that target the return to school and girls' and boys at risk of violence and abuse (including online). In general, these programmes focussed on access to education services (including continuity of learning), rather than improving the quality of education services in the context of the pandemic.

**Save the Children and CARE International are prominent organisations that support migrants and ethnic minorities in the region, which included refugees from Myanmar.** In Cambodia, CARE International developed culturally-sensitive learning materials for ethnic minority languages and a multilingual curriculum, which was supported by scholarships for children from low-income families and teacher training. This programme had a specific focus on supporting girls, including through teacher training on gender-responsive and gender-transformative teaching. The programme saw a significant increase in girls' primary and secondary enrolment, and improved enrolment rates amongst indigenous students in lower secondary education.

**Only four programmes were identified in East Timor/Timor-Leste and Papua New Guinea.** In Papua New Guinea, the identified programmes focused on improving teaching quality across elementary schools to prevent drop-out of vulnerable populations, especially girls. In East Timor/Timor-Leste, a World Bank-funded project targeted out-of-school youth (with gender-disaggregated data) through a national equivalency programme.

For adolescent girls in both countries, Water Aid works to keep girls in school through improving menstrual and reproductive health, including through water, sanitation and hygiene (WASH).

**There was a strong focus on technical, vocational education and training (TVET) programmes in Cambodia, Laos, the Philippines, and East Timor/Timor-Leste. These programmes mostly targeted out-of-school adolescents, with a particular focus on adolescent girls.** In Cambodia and Timor-Leste, TVET programmes also included some form of accelerated learning or catch up programmes, for example national equivalency or adult literacy classes.

The INOVASI Gender Equality and Social Inclusion (GESI) Strategy pilot programme in Indonesia, funded by DFAT, included a strand that focused particularly on **children who work and are enrolled in formal education** (Australian Government Department for Foreign Affairs and Trade, n.d.). This included providing continuity of access to literacy learning during seasonal breaks in schooling, supplying simple take-home activities, and working with parents, guardians and wider communities to encourage increased attendance at school.

**Two programmes identified in the mapping study explicitly mentioned activities that targeted children with disabilities** (Save the Children in Pursat, Cambodia; INOVASI Gender Equality and Social Inclusion (GESI) Strategy pilot programme, Indonesia).<sup>1</sup> Other programmes noted that target beneficiaries were marginalised and vulnerable children and young people, which included children with disabilities. For these latter programmes, the information available was generic and did not highlight how activities would support children with disabilities nor provide data disaggregated by disability.

The limited number of programmes identified in this study that target children and young people with disabilities may be a result of the focus on gender in the search, rather than disability.

**EdTech approaches, specifically blended and remote learning, were a prominent feature in programmes that sought to improve access to education for marginalised groups** (gender, geographical location, and out of school children and young people). In some cases, EdTech was complemented by low- and no-tech solutions, including the broadcasted lessons and the provision of televisions and radios. This involves five programmes that were active *before* the Covid-19 pandemic.

In the Philippines, the alternative learning programme team noted the use of partnerships with local information technology (IT) providers to support the delivery of resources to target beneficiaries (UNICEF, 2020). In Indonesia, the Girls Innovation Camps programme fostered partnerships with IT companies to better match workforce supply and demand as well as expose students to the latest technology, real work environments, and personal skills required by the 21st century world of work (eSkills4Girls, n.d.; Deutsche Gesellschaft für Internationale Zusammenarbeit, n.d.).

---

<sup>1</sup> Note: no impact data was identified for these programmes.

Of the areas of technical and thematic interest, the number of programmes were identified:

Area of interest	Programmes identified
Accelerated learning	9
Girls' education post-Covid-19	7
Non-formal education	3
Supplementary education	9
Female empowerment	Girls' clubs: 1 Life skills: 13 Economic empowerment: 12
Climate change	3
Education Technology (EdTech)	8
Inclusion of the most marginalised	All programmes' <i>end</i> beneficiaries were marginalised groups.  Most programmes' <i>direct</i> beneficiaries were marginalised groups.

Source: Author's own

Lastly, although no programme-level information was found, UNESCO's activity in the region had a strong focus on girls' science, technology, engineering and mathematics (STEM) education (UNESCO, 2017).

A project to support vocational training	Cambodia	AFD and ADB	Ministry of Labour and Vocational Training	2016-2021		TVET					Y				Promoting access to vocational training through a scholarship system, gateways, skills certification and an efficient social marketing strategy. The goal is to promote training programmes, especially for women. Improving the quality of vocational training and involvement of the private sector. Strengthening the governance and management of the vocational training system.	Focus on women's access for training and employment	Funding to Ministry through Sovereign Loan	N/A	EUR 13,200,000	N/A	<a href="https://www.afd.fr/en/carte-des-projets/projet-support-cocof03c">https://www.afd.fr/en/carte-des-projets/projet-support-cocof03c</a> <a href="https://www.afd.fr/en/carte-des-projets/projet-support-cocof03c">https://www.afd.fr/en/carte-des-projets/projet-support-cocof03c</a> <a href="https://www.afd.fr/en/carte-des-projets/projet-support-cocof03c">https://www.afd.fr/en/carte-des-projets/projet-support-cocof03c</a>	22/10/2020		
Second Strengthening Technical and Vocational Education and Training Project	Laos	ADB	MoE	2017 - 2022	Current and prospective TVET students with a specific focus on female students (all data disaggregated by gender)	TVET					Y				Teaching and learning environments at eight TVET colleges upgraded. Quality and relevance of demand-driven programs improved. Access to TVET institutions for disadvantaged students increased (focus on female students from low-income families).			No impact data available. Expected impact - Sufficient skilled labor available to maintain inclusive and sustainable development in the Lao PDR.	USD 25 million		<a href="https://www.adb.org/projects/45272-024main/operation-overview">https://www.adb.org/projects/45272-024main/operation-overview</a>	22-Oct		
Lower Secondary Education for the Most Disadvantaged Regions	Viet Nam	ADB	Min. of Education and Training	2008 - 2015	all learners aged 11-14, specific focus on 17 poorest provinces, and girls	Secondary school	Y		Y		Y				Improving access to lower secondary education. Enhancing quality and relevance of LSE. Introducing pilot innovations to improve access and equity for minorities and girls, and improving planning and managing capacity for LSE in most disadvantaged regions.			national NER reached 90.9% in Y1 (exceeding 90% target). The project increased the capacity of lower secondary schools to absorb an additional 99,075 LSE students. About 47% of these additional LSE students were girls who now have better accommodation that is gender segregated and well secured. Significant impact of the new curricular material and teacher training. The training of about 220,466 LSE teachers has increased the capacity and number of teachers in the disadvantaged regions.	USD 50 million	700,000 children in 17 poorest provinces	<a href="https://www.adb.org/sites/default/files/publication/193011/08-vie-lower-secondary.pdf">https://www.adb.org/sites/default/files/publication/193011/08-vie-lower-secondary.pdf</a> <a href="https://www.adb.org/sites/default/files/publication/document/19421/18/vie-pur-484.pdf">https://www.adb.org/sites/default/files/publication/document/19421/18/vie-pur-484.pdf</a>	22-Oct		
Young LGBTIQ people's family acceptance programmes in ASEAN	ASEAN region		Save the Children	2017 - ongoing	LGBTIQ young people across ASEAN, including those at risk of school drop out due to bullying and other abuse										A two-day conference hosted in the Philippines on LGBTIQ family acceptance. Allies from the academe, the child rights movement, community organizations, and Vietnam's Parents and Friends of Lesbians and Gays (PFLAG) gathered to discuss key issues regarding families and their relationships with LGBTIQ people, good practices in promoting family acceptance, and potential strategies to move the advocacy forward in Southeast Asia.	Programmes in the region include: - ChildFund: school-based child protection programs, training sessions with peer educators, and Parent Effectiveness Sessions all now integrate LGBTIQ issues.				<a href="https://resourcecentre.savethechildren.net/0/13625/pdf/documentation/_nw_promoting_family_acceptance_in_asean.pdf">https://resourcecentre.savethechildren.net/0/13625/pdf/documentation/_nw_promoting_family_acceptance_in_asean.pdf</a>	23/10/2020			
Child Protection in Emergencies Professional Development Programme	Asia Pacific Region		Save the Children	2016-ongoing	Mid-level child protection professionals from national and international NGOs, government representatives	N/A									The CPD programme includes: psychosocial wellbeing of children, young people, and their carers; sexual and gender-based violence; safeguarding child labour; LGBTIQ children; inclusive programming; emergency preparedness; and cross cutting themes includes gender.	The CPD programme encourages participants to then train others on the content of the CPD. Save the Children estimate that 363 people benefited from training 19 professionals.	Also includes elements of experiential learning	Supporting child protection professionals to support vulnerable children in response to crisis.	No impact data on the long-term outcomes of the training, however some data provided on participant experience, for example.		<a href="https://resourcecentre.savethechildren.net/0/17773/pdf/cpe_pdb_wsl_pgrdc_4h_cs_06_and_of_nods_report_final.pdf">https://resourcecentre.savethechildren.net/0/17773/pdf/cpe_pdb_wsl_pgrdc_4h_cs_06_and_of_nods_report_final.pdf</a> <a href="https://resourcecentre.savethechildren.net/0/17096/pdf/cpe_pdb_wsl_pgrdc_3rd_of_cycle_9_month_follow_up_report_final.pdf">https://resourcecentre.savethechildren.net/0/17096/pdf/cpe_pdb_wsl_pgrdc_3rd_of_cycle_9_month_follow_up_report_final.pdf</a> <a href="https://resourcecentre.savethechildren.net/0/15491/pdf/emergency-preparedness-programme-asia-pacific-3rd-cycle">https://resourcecentre.savethechildren.net/0/15491/pdf/emergency-preparedness-programme-asia-pacific-3rd-cycle</a>	23/10/2020		
Cambodia Education Sector Plan (mid-term review from 2016)	Cambodia		Ministry of Education, Youth and Sport	2014-2018	Access to basic education for all girls	Primary, secondary, higher education					Y				Increasing access to education for girls includes: strengthening infrastructure, including by increasing the number of secondary schools; supporting the transition from elementary to secondary schools, and secondary education to higher education; support for girls to study STEM subjects, including through career counselling, sexual and reproductive health and rights education; enhancing quality of teaching and learning through teacher training.	Support for gender mainstreaming at a teacher-level includes: Introduction of guidelines on new teacher deployment which include motivation to female teachers to be able to teach and have safe living conditions; Expansion and promotion of CFS program in the basic education; development of Child and Youth Council and female counsellors; organization of management structuring of female education staff from national to sub-national levels; introduction of a three-month maternity leave and allowance; focus on the development of female teachers' accommodations, especially in rural and disadvantaged areas; offer opportunities to attend various workshops and training courses both in the country and overseas; prioritize women in promotion to higher position when having equal evaluation score with men; and support the allowances to improve the teachers' living condition in rural and disadvantaged areas.		Results-based framework being developed. However challenges include: shortage of teachers in disadvantaged areas, resulting in employment of contract teachers that tend to have lower qualifications and less training. School retention and completion requires improvement in disadvantaged areas and for marginalised children. A large proportion of children are not meeting expected proficiency for reading, writing and mathematics.	In 2015 the Ministry proposed to allocate 8% of the total program budget for the implementation of gender mainstreaming. This does not include program budgeting by sub-sector, which contributes to the promotion of gender equality in education sector.		<a href="https://planpolicies.ilo.unesco.org/sites/default/files/ressources/cambodia_education_sector-plan_2014-2018.pdf">https://planpolicies.ilo.unesco.org/sites/default/files/ressources/cambodia_education_sector-plan_2014-2018.pdf</a>	23/10/2020		
Cambodia Education Response to Covid-19	Cambodia		Ministry of Education, Youth and Sport	2020 - ongoing	Marginalised and vulnerable children, including those at risk of violence, children with disabilities, multi-grade learners, and girls. Adolescent girls	All education sub-sectors		Y							Short-term response to Covid-19 included: the production of information, education and communication (IEC) materials and associated risk communication activities; the provision of hygiene supplies to schools; the ID Poor cash transfer programme, including links with the MEdYS scholarship programme; technical assistance for the MEdYS national scholarship programme; the provision of school meals to children from poor households; and preparedness for safe school re-opening.	Focus on preventing abuse and exploitation of adolescent girls, addressing the high rates of drop out, retaining children in learning activities during school closures, and ensuring existing schools have minimum WASH facilities prior to the safe return of children to school.		Has MAE framework with key output indicators, however has a stronger focus on vulnerable children (see under target population) than girls.		<a href="https://planpolicies.ilo.unesco.org/sites/default/files/ressources/cambodia_education_sector-plan_to_covid19_pandemic_july_2020.pdf">https://planpolicies.ilo.unesco.org/sites/default/files/ressources/cambodia_education_sector-plan_to_covid19_pandemic_july_2020.pdf</a>	23/10/2020			
Pursat Project: Quality Learning Environments	Cambodia		Save the Children	Not provided	Pursat Province (rural area) Children aged 6-14 Children with disabilities (mostly physical and sensory disabilities). Vulnerable girls Children of migrants	Primary Lower secondary								The project provides technical support in 8 primary schools that function as models for other schools in the same district and supports more than 3,000 disadvantaged children (6-14 years) to get access to and benefit from inclusive education also by providing scholarships, school materials and means of transport (e.g. bicycles) when required. Awareness raising among local authorities, parents and teachers improved overall understanding of disability, and resulted in increased enrolment and retention of children with disabilities.	Teacher training on inclusive pedagogy (inc. teaching manuals); established demonstration classrooms; school mapping to monitor enrolment and attendance (with children with disabilities and children at risk highlighted); training to other education stakeholders on child rights and non-discrimination.		Impact data not available		<a href="https://cambodia.savethechildren.net/sites/cambodia.savethechildren.net/files/library/SC_FactSheet_Education_LR_0.pdf">https://cambodia.savethechildren.net/sites/cambodia.savethechildren.net/files/library/SC_FactSheet_Education_LR_0.pdf</a> <a href="https://resourcecentre.savethechildren.net/0/15216/pdf/inclusive_education_report_2019_0.pdf">https://resourcecentre.savethechildren.net/0/15216/pdf/inclusive_education_report_2019_0.pdf</a>	23/10/2020				
I'm Learning! Pilot	Cambodia	Norad	Save the Children	2013-2018	Schools from Kampong Cham, Kampong Chhnang and Kratie provinces (with children from both disadvantaged and advantaged backgrounds) Gender disaggregated data	Primary								Objectives of the programme are to enhance: primary school learning environments and thereby improve school enrolment, retention, and children's literacy, numeracy, and life skills.	Included teacher training (inc. train the trainer approaches) Supported community-led accountability of schools through parental engagement.	I'm Learning in Cambodia fosters community engagement and creates community structures that help the school achieve the MEdYS policy for Child-Friendly Schools. The programme empowers community members, parents, students, and teachers to routinely assess their environment using the OLE assessment and to plan interventions that enhance the safety, WASH, child participation, child rights, learning aids, and teaching methodologies within the schools. Partnership with local and national governments throughout the life of the pilot, coupled with strong evidence of programme effectiveness, has ensured nationwide governmental uptake and support of the programme, the first step for sustained commitment to I'm Learning's approach for children's learning and development.	Quality Learning Environment framework used as MSE tools, which covers: emotional and psychological protection, Physical protection, active learning process, improved learning outcomes, close collaboration between school, parents and community.	Outcomes: - Small improvement in enrolment for girls and boys, especially in disadvantaged schools - Enrolment in areas associated with high migration dropped by 15% - Drop out significantly decreased, however retention rate stayed high (especially in grade 1) - In 2013/14, retention rates for girls at two of the schools was below 70%. By end of the project, retention rate across the three schools averaged above 90%, with two of the school's achieving 100% retention. This is a significant achievement for low resourced schools. A likely contributing factor is the significant improvement in the quality learning environment, including changes in the teaching quality, reduction in	USD 2,072,063	16 schools 197 teachers 9,353 (4,483 F) students	<a href="https://resourcecentre.savethechildren.net/0/13431/pdf/im_learning_summative_report_24_june_2018_final.pdf">https://resourcecentre.savethechildren.net/0/13431/pdf/im_learning_summative_report_24_june_2018_final.pdf</a> <a href="https://resourcecentre.savethechildren.net/0/12418/pdf/implementation_guide_final.pdf">https://resourcecentre.savethechildren.net/0/12418/pdf/implementation_guide_final.pdf</a> <a href="https://resourcecentre.savethechildren.net/0/13438/pdf/im_learning_country_report_cambodia_final.pdf.pdf">https://resourcecentre.savethechildren.net/0/13438/pdf/im_learning_country_report_cambodia_final.pdf.pdf</a>	23/10/2020		
Room to Read	Cambodia			2003-ongoing	Adolescent girls at risk of school-drop out Grades 6-12	Secondary school					Y				Keeps girls in secondary school through life skills, mentorship, material support (i.e. costs to cover uniforms and learning materials), and family and community engagement.			Technical assistance to prepare life skills teacher's guide	No quantitative impact data shared	Around 15,000 beneficiaries	<a href="http://www.roomtoread.org/countries/cambodia">http://www.roomtoread.org/countries/cambodia</a>	23/10/2020		
Room to Read	Laos			2003-ongoing	Adolescent girls at risk of school-drop out Grades 6-12	Secondary school					Y				Many of the girls in the Laotian program come from low-income families in rural villages where only a few professions exist. To prevent girls from feeling limited to just the options they see at home, Room to Read's social mobilizers in Laos help inform girls about further educational or career paths that exist outside of their communities. They reach this goal, in part, by visiting universities and businesses where girls can meet female professionals and ask questions of those who have taken this path.			No quantitative impact data shared	Around 2,500 beneficiaries	<a href="http://www.roomtoread.org/countries/laos/patam-highlights/">http://www.roomtoread.org/countries/laos/patam-highlights/</a>	23/10/2020			
Literacy Boost	Laos, Bolikhamxay Dist	Save the Children	Save the Children	2013-2018	20 schools in Vientianghong district, targeting all children in grades 1-3. However, specific focus on: Disadvantaged ethnic groups Girls in poorer provinces	Primary									Improving children's emergent literacy skills through teacher training and coaching-mentoring visits, community reading activities to promote reading outside of the classroom, and age-appropriate local language material creation/learning material provision.			Impact on reading outcomes: - All students benefited from the intervention - Girls improved by one percentage point, and outperformed boys in four of the six measured outcomes - Mixed results for ethnic minority groups - However, too many children are still unable to achieve reading skills at the level anticipated by the curriculum		<a href="https://resourcecentre.savethechildren.net/0/12428/pdf/lr_boost_impact_evaluation_report_2018_final.pdf">https://resourcecentre.savethechildren.net/0/12428/pdf/lr_boost_impact_evaluation_report_2018_final.pdf</a>	23/10/2020			
QUEST project	Myanmar (southeast)		Save the Children	2018-2021	Over 7,000 conflict-affected children across 300 community schools						Y				Project works to ensure conflict-affected children in Karen areas of Southeast Myanmar have access to quality basic education and non-formal education and communities support children's learning, through mobile-teacher training			Baseline data found that girls typically perform better than boys on almost all literacy tests		<a href="https://resourcecentre.savethechildren.net/0/14284/pdf/lr_boost_impact_evaluation_report_highres_approved_oct11-compressed.pdf">https://resourcecentre.savethechildren.net/0/14284/pdf/lr_boost_impact_evaluation_report_highres_approved_oct11-compressed.pdf</a>	23/10/2020			

Education Programme: Alternative Delivery Model (ADM) Called ACCESS from 2019 onwards	Philippines	DFAT	BRAC and Ministry of Basic, Higher, and Technical Education	2012-2019-2019-present	Lessons in remote provinces of the Philippines (Autonomous Region in Muslim Mindanao). This region has the lowest education performance in both elementary and secondary levels. Students perform poorly in Basic Education Indicators such as low participation rates, low preparedness for school, high drop-out rates and high literacy rates. Gender disaggregated data.	Basic education (primary and secondary)								Y	Access to education through constructing new schools, developing localised instructional materials (in five major languages of the region). Supports NGOs to support these schools, especially in areas with no government education facilities.				Before the intervention, boys had lower elementary completion rates than girls. However, an evaluation in 2017 found that elementary completion had not significantly improved.	USD 30 million	100,000 children in the region	<a href="https://www.bricsinternational.nl/en/wp-content/uploads/2018/12/philippines-11-18.pdf">https://www.bricsinternational.nl/en/wp-content/uploads/2018/12/philippines-11-18.pdf</a> <a href="https://www.brics.net/sites/default/files/2019/02/PHPhilippines.pdf">https://www.brics.net/sites/default/files/2019/02/PHPhilippines.pdf</a> <a href="https://www.bricsinternational.nl/en/where-we-work/philippines/web/culture/">https://www.bricsinternational.nl/en/where-we-work/philippines/web/culture/</a> <a href="https://www.dfat.gov.au/files/default/files/pdfs/2019/02/brics-access-2019-program-overview-2.pdf">https://www.dfat.gov.au/files/default/files/pdfs/2019/02/brics-access-2019-program-overview-2.pdf</a>	23/10/2020										
WASH in Schools: Three Start	Philippines	ANCP and DFAT	Philippines Department of Education	2016-Ongoing	Adolescent girls in school	Lower secondary, upper secondary								Y	The Water, Sanitation, and Hygiene in School (WINS) booklets were developed by the Philippines Department of Education (DepEd) with support from the members of the WINS Technical Working Group, which Save the Children Philippines is part of. These resources on deworming, hygiene, sanitation and water form part of a series of learning resources to support the implementation of DepEd Order No. 10 series of 2016 also known as the "Policy and Guidelines on Comprehensive WINS Program". These booklets contain information about the WINS policy and practical solutions, and on how to implement and improve situation of WINS in public schools in the Philippines, adopting the "Three Star Approach". It includes guidance on how to avoid girls from missing school by providing effective menstrual hygiene management.	The migrant education program is focused on strengthening the provision of pre-primary education via the network of twenty Migrant Learning Centers (MLC) in Tak province to boost school readiness and emergent literacy outcomes in Burmese and Sgaw Karen.		Included technical assistance to the OIE to create these guides	No impact data available.		<a href="https://resourcecentre.savethechildren.net/library/wash-schools-three-start-approach-hygiene">https://resourcecentre.savethechildren.net/library/wash-schools-three-start-approach-hygiene</a>	23/10/2020											
Mindanao Youth for Development (MYDEV)	Philippines	US Aid	EDC	2013-2019	Out of school young people aged 15-24 (4.1%)	TVET	Y							Y	Implemented livelihood skills trainings for youth through the Department of Education's Technical Education and Skills Development Authority and local service agencies in selected conflict-affected areas in Mindanao. Supported equitable access to basic education and high school equivalency courses through the Department of Education's Alternative Learning Systems. Delivered EDC's Work Ready Now! curriculum to enable young people to think critically and act creatively while demonstrating effective Work habits, communication skills and interaction, and disciplined personal conduct in the workplace.	A training-of-trainers program was developed to build educators' skills in trauma-informed, evidence-informed mental health interventions including positive coping skill activities and resilience-building approaches. The curriculum is based on a combination of principles from cognitive-behavioral theory and incorporates an acceptance and commitment therapy orientation.	USAID also established out-of-school youth development alliances in eight communities, convening local governments, academia, the private sector and national government agencies to address issues important to out-of-school youth and link them to employment.	Impact evaluation data suggest that participation in the resiliency module for youth beneficiaries led to improved decision making, changed views on the acceptability of violence, promoted greater consideration of consequences of actions prior to reacting, and improved ability to manage anger.	Enrolled 10,820 F, 15,099 M Completed 9,408 F, 12,755 M Certified 6,501 F, 8,479 M	16,000 young people	<a href="https://usaidpubs.exposure.covwelding-hopes-and-dreams">https://usaidpubs.exposure.covwelding-hopes-and-dreams</a> <a href="https://www.edc.org/files/default/files/upload/MyDev-Final-Report.pdf">https://www.edc.org/files/default/files/upload/MyDev-Final-Report.pdf</a> <a href="https://www.edc.org/mindanao-youth-development-mydev">https://www.edc.org/mindanao-youth-development-mydev</a>	23/10/2020											
REACT project and Expanding Migrant Protection and Assistance for Children in Thailand: migrant education program	Thailand	Save the Children	Save the Children	2017-2021	Migrant girls and boys (aged 3-5) in the Tak and Ranong province of Thailand	ECEC								Y	The REACT project aims to ensure migrant children are able to access a quality basic education and that communities support children's learning. The Expanding IMPACT project aims to strengthen local child protection mechanisms through capacity building and facilitates access to quality education for migrant boys and girls to ensure they learn.			Home characteristics between Thai and migrant ECEC centres had significant gaps, although child development did not vary much. Migrant children tend to experience higher levels of harsh discipline at home (corporal punishment, shouting). Girls generally performed slightly better than boys, especially on tasks requiring motor skills. Numeracy skills correlated with higher levels of caregiver knowledge about positive discipline, and motor skills correlated with caregiver's health status.		20 ECEC centres	<a href="https://resourcecentre.savethechildren.net/library/19446349464_early_learn018.pdf">https://resourcecentre.savethechildren.net/library/19446349464_early_learn018.pdf</a>	23/10/2020

Developing training materials for teachers to effectively support remote learning Developing a catch-up/medial program for children lagging behind including for those who could not access online media, radio or TV and children with disabilities Providing psychosocial support to students, teachers and education staff in partnership with relevant government bodies and partners					USD 7 million	Nationwide	<a href="https://www.gbbatpartnership.org/where-we-work/laos/">https://www.gbbatpartnership.org/where-we-work/laos/</a> <a href="http://www.moe.edu.la/moe/images/Angeles%20Lao_PDR_Education_COVID-19_Response_Plan.pdf">http://www.moe.edu.la/moe/images/Angeles%20Lao_PDR_Education_COVID-19_Response_Plan.pdf</a> <a href="https://www.gbbatpartnership.org/content/view/full/114">https://www.gbbatpartnership.org/content/view/full/114</a> <a href="https://www.gbbatpartnership.org/sites/default/files/2020-08/2020-08-26-2020-08-26.pdf">https://www.gbbatpartnership.org/sites/default/files/2020-08/2020-08-26-2020-08-26.pdf</a> <a href="https://www.gbbatpartnership.org/sites/default/files/2020-08/2020-08-26-2020-08-26.pdf">https://www.gbbatpartnership.org/sites/default/files/2020-08/2020-08-26-2020-08-26.pdf</a>	26/10/2020									
Girls Innovation Camps - Sustainable Economic Development through Technical and Vocational Education and Training	Indonesia	BMZ	GIZ	2014-2017	Female students and teachers									Y	The Girls Innovation Camp (GIC) initiated by Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) on behalf of the Federal Ministry for Economic Cooperation and Development (BMZ), in cooperation with the Indonesian Ministry of Education and Culture as well as Intel Indonesia, addresses the need for improving gender equality in the workplace by raising the digital skill levels of women. Organized for the first time in 2016, the Girls Innovation Camp offers hands-on training in design thinking for innovation, career guidance, and provided an introduction to the basics of teamwork, leadership, and gender mainstreaming to female students and teachers. The initiative aims to foster innovation among students and teachers using technology in order to prepare them for jobs in the digital economy. Aside from Intel, GIZ is currently cooperating with other IT companies such as IBM, Avaco or the local developer hub, Decoding. This type of collaboration is needed to better match workforce supply and demand as well as expose students to the latest technology, real work environments, and personal skills required by the 21st century world of work. In addition to the realization of the innovation camp, two firms on gender were produced in cooperation with the Indonesian Ministry of Education and Culture as well as the private sector to promote and encourage women to study and work in the field of STEM and to address the importance of gender equality in companies. Connect to Learn UNESCO ICT for Education Programme	Myanmar	FCDO, Ericsson	UNESCO (and others)	2015-	Grade 8-11 students in rural and semi-urban areas Marginalised girls	Secondary school				Via tablets				Y	Y	Supporting girls' ICT skills through teacher CPD The Connect To Learn program connects 31 schools to mobile broadband networks to improve the learning outcomes of nearly 30,000 students in Myanmar, including 15,000 underprivileged girls.	Apart from the teacher professional development component, UNESCO is implementing the two other main components that make up the initiative, which focus on utilizing mobile broadband technology to provide students with an English language programme and a life skills programme, including the development and delivery of content-specific applications and learning content in English and life skills.	No indication of outcomes of programme The program has reached 31 schools and 310 teachers. It has directly benefited 34,000 students and provided 600 scholarships for girls.		31 schools, reaching 30,000 learners	<a href="https://www.unesco.org/en/education/ict-education-programme">https://www.unesco.org/en/education/ict-education-programme</a>	26/10/2020	
ACCESS	Eastern Myanmar Thailand		Educate a Child and Save the Children	2014- (programme completed)	Children in Eastern Myanmar, refugee camps in Thailand, migrant communities in Bangkok and Mae Sot (Thailand)	Basic education (primary and secondary)								Y	Y	Specific project activities include: helping communities understand the nature and type of education that is offered; actively identifying out of school children (OOSC) and supporting their enrollment in formal education; and engaging parents and communities in the development and delivery of educational services. The project is also increasing the supply of, and access to, education by providing financial support to families to offset direct and opportunity costs in accessing education; conducting pre- and in-service teacher training on quality instruction and classroom management; supporting teacher employment through salary subsidies; providing learning materials and school supplies; and supporting school system managers and leaders. STC is also working to integrate children into the public education system in Thailand when possible.		No indication of programme outcomes		Approximately 377,000 migrant, 30,000 refugee, and more than 400,000 ethnic Karen children	<a href="https://educateachild.org/partners-projects/projects/access">https://educateachild.org/partners-projects/projects/access</a>	26/10/2020	
Education for All: An Integrated Approach	Cambodia		Educate a Child and Aide et Action International	Completed, no dates shared	Out of school children in 10 provinces in Cambodia with the highest number of out of school children Out of school girls	Basic education (primary)	Y						Y	Y	Although enrolling and retaining children in primary education is the core of this project, it also involves enabling physical and financial access to education, research, a sharing network, policy advocacy, and capacity-building of the school support committee (SSC) and the commune council for women and children (CCWC) to lead effective enrolment campaigns and map where the most vulnerable children live. Additional strategies include: addressing parents' and communities' stigma toward OOSC; providing remedial education to enable students to catch up and reintegrate into the public system; and addressing structural factors in the education system that impede access such as teacher shortages and incomplete schools.		No indication of programme outcomes Programme objectives were to: Ensuring the enrollment of at least 45,000 out of school children (OOSC) in formal or non-formal education system of which 50% are girls. Retaining 45,569 children 1 school throughout a full cycle. Running focus groups and dialogue with social workers for 13,300 parents. Implementing tutoring services for students with learning difficulties and those repeating their grades, as well as implementing a re-entry program. Providing the required support for children with disabilities, girls, underprivileged students, and children of ethnic minorities to access school (transport, infrastructure, etc.). Providing safe and friendly school environments for children and community. Setting up bilingual classrooms (with classes both in Khmer and the community's local language). Improving school service provisions and developed the capacities of the Department of Education at all levels.			<a href="https://educateachild.org/partners-projects/projects/access">https://educateachild.org/partners-projects/projects/access</a>	26/10/2020

A special focus in our DRR work in Cambodia is put on increasing women's engagement and leadership in DRR, DMI, and Climate Change Adaptation (CCA), through targeted capacity building, awareness raising and training with the aim of moving women to the front row when it comes to DRR and CCA debate and decision making. Secondly, we are supporting Integrated Water Resources Management (IWRM) an through monitoring in Cambodia to be prepared for the predicted effects of Climate Change that we already felt in Cambodia.	Also developing a Cambodia Women's Resilience Index	No programme level outcomes shared			<a href="https://cambodia.actionaid.org/publications/2019/actionaid-cambodia-disaster-risk-reduction-management-and-climate-change">https://cambodia.actionaid.org/publications/2019/actionaid-cambodia-disaster-risk-reduction-management-and-climate-change</a>	26/10/2020		
Response to 2018 earthquake on Sulawesi Island	Indonesia		Educate a Child and Save the Children, UNICEF	2018-2020	Crisis-affected children (gender)	Basic education Primary ECEC							Y	Y	Education continuity: increasing access to inclusive education through temporary learning spaces, providing educational supplies along with recreational and learning materials and kits for children with disabilities were distributed to enhance access. Child-friendly spaces were created to provide an additional avenue for the provision of psychosocial support to students, teachers, parents and community members. Enhanced quality of education. Trainings were held for teachers, school supervisors, headmasters and other stakeholders on child protection and gender-based violence, psychosocial support, Education Childhood and Care Development, and education in emergencies. The aim was to increase the capacity of delivering education in a context characterised by a high prevalence of trauma among students.	Distribution of learning and recreational materials for students and teachers. Learning environments were improved through distribution of education, recreational, and early childhood development kits for children.	Has reached: 213 teachers and 2,181 children with psychosocial support Supported 2,096 (49% F) with temporary learning spaces 49,033 children provided with educational supplies		63,302 children	<a href="https://www.educationforchild.org/australia/">https://www.educationforchild.org/australia/</a>	26/10/2020		
Investing in Adolescent Girls Education in Cambodia: Pathways to a Brighter Future	Cambodia		The Asia Foundation	2017	Girls in school at risk of drop out Adolescent girls	Secondary school							Y	Y	IAGEC has two main objectives: (1) to lower drop-out rates in secondary schools and keep young people in school, eliminating one of the root causes of labor migration; and (2) to empower at-risk, adolescent girls to take leadership roles in school and improve their education and career pathways that match Cambodia's changing economic landscape.	Working with local partner the Khmer Youth Association (KYA), IAGEC has supported 410 students, 80 percent of them girls, at six remote schools in Siem Reap, Kampong Cham, and Prey Veng provinces known for their high drop-out rates and pervasive labor migration. The program uses a two-pronged strategy. First, students and their families receive material support for students' basic, practical needs—bicycles for getting to school, pens and paper for schoolwork, uniforms, school bags, and rice. Second, IAGEC provides a mentoring and enrichment experience to help students grow personally, academically, and eventually professionally.	IAGEC has reduced the drop-out rate among participating students to 11 percent, compared to a national average of 19 percent. Through mentoring and "exposure visits" to their university-level peers, students gain confidence and the ambition to increase their academic performance. Last year, 67 percent of IAGEC students passed their baccalaureate exams, a rate 10 points higher than the average for the six participating schools, and a point higher than the national rate of 66 percent, a slim but symbolic margin for a group of disadvantaged young people who might never have been enrolled.	Small scale (410 students)		<a href="https://asiafoundation.org/2019/03/13/news-ya-to-cambodias-adolescent-girls/">https://asiafoundation.org/2019/03/13/news-ya-to-cambodias-adolescent-girls/</a>	26/10/2020		
INOVASI Gender Equality and Social Inclusion (GESI) Strategy	Indonesia	DFAT		2018-ongoing	"Children potentially excluded from learning" Children with disabilities Primary children (focus on girls) Children from minority ethnic groups Children at risk of violence and abuse Children who work	Primary education (enrolment)							Y	Y	Four pilot programmes that: Focus on disability. Through this pilot we are developing a toolkit that will include: a student learning profile tool; a handbook on disability-inclusive education strategies for teachers; specific sessions on inclusion within the literacy short course that covers differentiated instruction; and a short course on disability-inclusive education. Focus on wellbeing. The linguistic playing field: build teachers' capacity to lay the foundations of literacy for students using their mother tongue and to facilitate the transfer of their literacy and cognitive skills to Bahasa Indonesian. The pilot includes sessions on the basic principles of bridging between the students' home language and school language (Bahasa Indonesian) emphasising language bridging, oral language, phonics as well as social and emotional connections. These sessions will be delivered within the framework of the literacy short course. Focus on children who work. To address the specific needs of these children, the pilot seeks to ensure continued access to literacy learning during the seasonal break in schooling. It will do this by working with schools to create simple, take-home literacy activities they can complete at home with the assistance of parents or other adults. The pilot also aims to improve attendance at school by working with parents and guardians who decide on children's usage of time. Working with village authorities, we will organise short sessions for parents and community members to raise awareness of child rights and wellbeing. The sessions will also improve parents' skills, so they can ensure their children's wellbeing and support their literacy learning at home and in the community. Focus on remote schools. INOVASI in North Kalimantan is currently developing a pilot to establish a mechanism for school supervisors to easily supervise and monitor teachers based in remote and hard-to-reach areas. The idea of the pilot is for teachers to use social media platforms (email, WhatsApp) to communicate with their supervisors about the teaching and learning.			<a href="https://www.dfat.gov.au/about-us/publications/policies/innovation-gender-equality-and-social-inclusion-strategy">https://www.dfat.gov.au/about-us/publications/policies/innovation-gender-equality-and-social-inclusion-strategy</a>	26/10/2020				
Easy2Learn Project	Cambodia	ChildFund Australia, DFAT	ChildFund Australia, Kampuchean Action for Primary Education (KAPE)	2014 - date	Early Grades (focus on girls)	Primary school							Y	Y	Pilot program. Child-to-child reading method aimed at improving literacy in rural communities in Cambodia. ChildFund uses mobile technology to help children, particularly girls, learn literacy skills more effectively.		Scores of Grade 1 students tested doubling from a baseline of 7% to 14%, and Grade 2 scores almost tripling from 9% to 25%.		8 primary schools	<a href="https://www.dfat.gov.au/about-us/publications/policies/innovation-gender-equality-and-social-inclusion-strategy">https://www.dfat.gov.au/about-us/publications/policies/innovation-gender-equality-and-social-inclusion-strategy</a>	26/10/2020		
BEQUAL	Laos	DFAT, EU	Ministry of Education and Sports, Cobry, Tetratch	2015 - 2020 (Phase 1)	All children grades 1-6 with a focus on children who traditionally experience poorer education outcomes - girls, students with disabilities and children from the more remote communities	Primary school							Y	Y	Development and implementation of the national new curriculum for grades 1-6, the improvement of teacher education and the strengthening of support systems such as planning, management and monitoring of teaching.	Building capacity of the Ministry to develop and implement new curriculum	MEL framework established but too early for impact measurement	AUD 65 million for phase 1	740,000 children in 32 educationally disadvantaged districts.	<a href="http://www.bequal-laos.org/about-bequal-overview">http://www.bequal-laos.org/about-bequal-overview</a>	26/10/2020		
Decentralising Funding to Schools Project	Myanmar	World Bank, DFAT	Ministry of Education	2014 - 2021	All primary schools with a focus on disadvantaged populations	Primary school							Y	Y	Expansion and improvement of the school grants program Expansion and improvement of the student stipends program Capacity improvement to strengthen monitoring and implementation of programs	In-service teacher-mentoring program, which sees experienced teachers providing guidance and support during visits to schools.	Has enabled nearly 193,000 disadvantaged students (53.6 per cent girls) to continue their schooling.	USD 84 million		<a href="https://projects.worldbank.org/en/projects-operations/project-detail/P146337lan-en">https://projects.worldbank.org/en/projects-operations/project-detail/P146337lan-en</a>	26/10/2020		
Keeping Girls in School through Menstrual and Reproductive Health	East Timor, Papua New Guinea	DFAT	Marie Stopes, Water Aid Australia		Adolescent girls aged 15-19								Y	Y	An integrated health and WASH project that aims to contribute towards increased school retention in girls through reducing unintended pregnancies and improving menstrual health, in Timor-Leste and PNG while strengthening women-led businesses for the manufacture of accessible hygiene products in Timor-Leste.					<a href="https://www.dfat.gov.au/about-us/publications/policies/innovation-gender-equality-and-social-inclusion-strategy">https://www.dfat.gov.au/about-us/publications/policies/innovation-gender-equality-and-social-inclusion-strategy</a>	26/10/2020		
Hospitality Skills Development	Laos	Swiss Development Cooperation		2014-2025	Disadvantaged youth (70% F) from poor families	TVET			Y				Y	Y	The main support provided by the project will be capacity development for macro-level organizations to improve the scale and quality of the skills development training offer, both on the regulatory side (National Qualification Framework, curriculum development, competency assessment, training of trainers and teachers -> VETD and LANITH as main target organizations), and on the skills development provider side (20 new private training organizations, 50 hotels/restaurant with apprenticeship schemes as main target organizations, sub-contract to specialized company for managing the affirmative action scheme).	On macro-level, the project will engage in policy dialogue, capacity development and coordination support to the 3 involved ministries (Education, Labour, Tourism), the National Training Council (NTC), tourism employer associations, and projects funded by other DPs, enabling them to improve the framework conditions for hospitality skills development.	The project builds on the results of a successful project funded by the Government of Luxembourg over the past seven years. The project supported the creation and building up of LANITH (Laos National Institute of Tourism and Hospitality) as an autonomous, para-statal center of excellence in hospitality skills training. An independent evaluation confirmed the relevance of LANITH and the quality of products developed. The evaluation also highlighted two key weaknesses: support provided for families and only very few trainees come from poor families => those are the challenges tackled with the new project. The project approach is built on SDC's good practice example, the Employment Fund in Nepal.	CHF 19,250,000	20,000 young people	<a href="https://www.eda.admin.ch/deza/en/home/contenu/mekong.html#content/edaprojects/SD-C/2014/7709176/phase99/oldPageP/ath/content/deza/en/home/laender/mekong.html">https://www.eda.admin.ch/deza/en/home/contenu/mekong.html#content/edaprojects/SD-C/2014/7709176/phase99/oldPageP/ath/content/deza/en/home/laender/mekong.html</a>	27/10/2020
