

# Notes on Contributors

**Khurshid Alam** is a disaster and climate change specialist with experience in 25 countries in Asia and Africa. He was ActionAid's Emergency Policy Advisor in London and later managed a six-country tsunami response programme until becoming the Managing Director of ThinkAhead Limited in 2006. He writes on humanitarian and climate change issues. As a consultant, he has advised developing disaster risk reduction and climate change adaptation strategies, policies and projects for governments in Malawi and Cambodia, bilateral and UN agencies, international NGOs and the Red Cross. An anthropologist by training, he currently lives in Dhaka.

**Jeremy Allouche** is a Research Fellow at IDS specialising in international political economy and global environmental governance. He previously worked at the University of Oxford (2008/09), the Massachusetts Institute of Technology – MIT (2007/08), at École Polytechnique Fédérale in Lausanne where he was the director of the Water Institutions and Management Competence Centre (2003–07), at the Swiss Graduate Institute of Public Administration (1999–2002) and at the Graduate Institute of International and Development Studies, Geneva (2000–02). His fields of interest are global environmental governance and public–private partnerships, access to water and sanitation and pro-poor regulation and the political economy of climate change initiatives.

**Simon Anderson** is Head of the Climate Change Group at the International Institute for Environment and Development (IIED), where he is conducting research for advocacy on climate change adaptation effectiveness. His work focuses on climate adaptation (effectiveness and planning), programme management, agro-economic systems and agricultural science, policy analysis, and monitoring and evaluation. Simon was previously at the Central Research and Evaluation Departments for the UK Department for International Development (DFID); and the Centre for Poverty Reduction and Development at Imperial College, London. He holds a PhD in Agricultural Sciences.

**Jessica Ayers** is a researcher in the Climate Change Group at IIED, where she focuses on pro-poor approaches to climate change adaptation including planning, delivery and monitoring and evaluation. She was previously with the United Nations Development Programme (UNDP) Nepal working with the Government of Nepal on the development of their National Adaptation Programme of Action. She holds a PhD on climate change governance from the London School of Economics (LSE).

**Raul Chambote** holds a Masters in International Development from the International Development Department of the University of Birmingham, a degree in International Relations and Diplomacy from the Instituto Superior de Relações Internacionais (ISRI), Mozambique and a Certificate in Philosophy and Religious Studies from Saint Bonaventure College, Lusaka. A former Desk Officer in the SADC department of the Mozambique Ministry of Foreign Affairs and Cooperation, he currently teaches Development Studies at the Catholic University of Mozambique. His current research interests centre on African politics with a focus on the role of the elites in development.

**Blessings Chinsinga** is based at the Department of Political and Administrative Studies at Chancellor College, University of Malawi, where he is an Associate Professor. His main interests include institutions and development, political economy of policy processes, poverty and rural livelihoods, democracy and decentralisation, local level politics and climate change adaptation. He is a member of several international research consortia including Future Agricultures Consortium (FAC), coordinated by IDS.

**Paul Guthiga** is currently a policy analyst at the International Livestock Research Institute (ILRI). He brings experience in agricultural policy analysis and economics of natural resource management and governance in the East Africa region. He has previously worked on the economics of Reducing Emissions from

Deforestation and Forest Degradation (REDD) implementation; dynamics of reforms process in the forestry sector; economics of forest management and regional agricultural policy analysis in support of the Comprehensive African Agricultural Development Programme (CAADP).

**Sven Harmeling** has worked with Germanwatch as Senior Advisor Climate and Development since 2005. His focus areas of work are adaptation in the UNFCCC negotiations, the Adaptation Fund, and other aspects of climate finance. He also serves as chair of the climate change working group of the German Association of Development NGOs (VENRO). Prior to his involvement with Germanwatch, he worked as consultant for the Wuppertal Institute for Climate, Energy and Environment. Through his studies in Hannover, Vienna and Bonn, he holds a diploma in geography, political sciences and environmental economics.

**Leonardo Hasenclever** has a degree in Veterinary Medicine from the Federal University of Minas Gerais in Brazil and a Masters in Economic Management of the Environment from the Centre for the Study of Economics, Environment and Agriculture of the University of Brasília (CEEMA/UnB). Having worked as an Environmental Analyst for the Brazilian Environment Agency (IBAMA) and as an Environmental Economics researcher for various academic institutions and NGOs, he is currently working on REDD+ and indigenous peoples' issues at the International Institute of Education (IIEB) in Brazil ([www.iieb.org.br](http://www.iieb.org.br)).

**Rocío Hiraldo** recently completed a Masters in Development Studies at IDS. She also holds a BA in Social and Cultural Anthropology. She has worked as a consultant and research assistant on the political economy of REDD+ with a focus on Brazil and other research projects related to climate change at IDS. Through a power analysis of the conceptualisation and negotiation of climate change her Masters thesis analysed the role of REDD+ to improve community participation in forestry decision-making in Indonesia.

**Muhammad Jahedul Huq** is a Research Officer in Climate Change Adaptation and Disaster Risk Reduction at ActionAid Bangladesh. He has a Masters in Human Ecology from the Department of Human Ecology, Free University of Brussels,

Belgium. He also completed an MSc in Geography and Environment from Jahangirnagar University, Bangladesh.

**Sumaiya S. Kabir** was an International Climate Champion of the British Council Bangladesh and graduated with a BSc in Environmental Science from North South University. She is an associate consultant at ThinkAhead Limited engaged in research projects on climate change and disasters. Currently, she is doing a Masters in Disaster Management at BRAC University, Dhaka.

**Alpha O. Kaloga** has been a Climate Change Adaptation Advisor with Germanwatch since 2008. He works on adaptation to climate change and particularly on the Adaptation Fund. He comes from Guinea Conakry and is based in Bonn, where he also studied. He is a graduate of the Friedrich Wilhelm University and holds a MA in International Relations, Economic Policy and Public Law.

**Nanki Kaur** is a researcher in the Climate Change Group at IIED. Her work focuses on climate change adaptation and financing; institutional dimensions of natural resource governance; and pro-poor development. Before joining IIED, Nanki worked with the Overseas Development Institute (ODI) on climate change adaptation planning and water governance; and The Energy and Resources Institute (TERI) in Delhi on natural resource governance. She holds an MSc in Environmental Social Science.

**Richard J.T. Klein** is a senior research fellow at the Stockholm Environment Institute (SEI) and an adjunct professor at the Centre for Climate Science and Policy Research of Linköping University. Richard leads SEI's research theme of 'Reducing climate risk'. His own work focuses on adaptation finance and governance, vulnerability assessment, the role of the private sector in adaptation, and the links between climate and development. Richard is the founder and editor-in-chief of the academic journal *Climate and Development*. He has been an Intergovernmental Panel on Climate Change (IPCC) author since 1994, and co-director and chief scientist of the Nordic Centre of Excellence NORD-STAR since 2011.

**Sönke Kreft** has worked for Germanwatch as Senior Advisor Climate and Insurance since 2008. He focuses on adaptation strategies to climate

change with a particular focus on disaster risk management and insurance solutions and effective ways to implement these. He is an Associated Researcher with the United Nations University EHS (Institute for Environment and Human Security) Programme. Prior to working with Germanwatch, he was involved in research projects with the German Technical Cooperation (GTZ) and with MunichRe. Sönke holds an MSc in Global Change Management and a BSc in Agricultural Science after studying at the University of Sustainable Development, Eberswalde, the University of Göttingen and the University of Wales, Bangor.

**Ronald Mangani** has a PhD in Economics from the University of Cape Town. He has over 15 years of experience in university teaching, professional training, research and consultancy, and is currently Senior Lecturer in Economics at Chancellor College, University of Malawi. He has carried out many research and consultancy assignments for the Government of Malawi and a wide range of international organisations. Among other related engagements, he was the local team leader for a recently concluded economic study under the Malawi Poverty and Environment Initiative.

**Annett Möhner** pursues PhD research in the field of climate adaptation, international policy and development. She works at the UNFCCC Climate Change Secretariat in Bonn, Germany, where she currently supports the implementation of the Cancun Adaptation Framework and the Nairobi work programme on impacts, vulnerability and adaptation to climate change.

**Peter Mvula** is a socioeconomist, gender analyst and trainer based at the Centre for Social Research (CSR) at Chancellor College, University of Malawi, where he is a Senior Research Fellow. His main research interests include rural livelihoods and poverty, the dynamics of common pool resources and climate change adaptation with gender and HIV/AIDS as crosscutting considerations in these areas. He has published extensively on rural livelihoods, food security, poverty analysis, and disaster and relief operations.

**Lars Otto Naess** is a Research Fellow in the Climate Change and Development Centre at IDS. His current research interests include social and institutional dimensions of adaptation to

climate change, as well as policy processes on climate change and agriculture at national and sub-national levels. Much of his recent work has focused on Africa, in particular Tanzania, Kenya, Malawi and Ethiopia. He managed the DFID/IDRC Climate Change Adaptation in Africa (CCAA) 'Research to Policy for Adaptation' (RPA), and currently coordinates the Climate Change Theme of the DFID-funded Future Agricultures Consortium (FAC).

**Peter Newell** is Professor of International Development at the University of East Anglia (UEA) and Economic and Research Council (ESRC) Climate Change Leadership Fellow for the Governance of Clean Development Project. He has worked on different aspects of climate change and development for 18 years. This has included policy and advisory work for governments, international and civil society organisations and businesses. His publications include the books *Climate for Change* (Cambridge University Press), *Governing Climate Change* (Routledge) and *Climate Capitalism* (Cambridge University Press). He has worked at the universities of Warwick, Oxford and Sussex (IDS), as well as for FLACSO Argentina and Climate Network Europe in Brussels.

**Andrew Newsham** brings practical and theoretical insights from sociology, anthropology and geography to a research agenda which focuses on environment and development in Southern Africa and South America. One area of expertise relates to local knowledge and participation in combined conservation and development initiatives (Argentina, Namibia, Zimbabwe). Another strand explores the potential of local agro-ecological knowledge as a form of adaptive capacity to climate change impacts on agriculture. A third line of enquiry considers the extent to which climate change concerns are being mainstreamed into Southern African development policy and practice (Namibia and Mozambique).

**Jon Phillips** is Research Assistant on the Governance of Clean Development (GCD) project ([www.clean-development.com](http://www.clean-development.com)) at the School of International Development, University of East Anglia. His current research on the GCD project investigates the politics of energy finance, climate finance and carbon markets and the significance of the governance of these mechanisms in guiding a transitions to

decarbonised energy production in India, South Africa and globally. His previous work includes scalar analysis of gendered water politics in Liberia and studies of the paleochemistry of oceans as global greenhouse gas sinks.

**Emily Polack** is a researcher in land rights at the Natural Resources Group at IIED. She holds a Masters of Law in International Development and Human Rights. She has worked in community-based natural resource management and transboundary water conflicts in the Mekong Region, and her research interests are in the shaping and use of law in national and transnational activism for environmental and social justice. Prior to joining IIED, Emily worked at IDS where she worked on governance and accountability dimensions of climate change adaptation and on child-centred adaptation and disaster risk reduction.

**Pallav Purohit** is a Research Scholar at the International Institute for Applied Systems Analysis (IIASA), Austria; and a Visiting Fellow of the Governance of Clean Development Project at the University of East Anglia. He is working on the Greenhouse Gas and Air Pollution Interactions and Synergies (GAINS) project of IIASA. He holds a PhD in energy policy and planning from the Indian Institute of Technology in Delhi. His research interests include science; technology and policy focused on energy and environmental issues of developing countries; renewable energy; the clean development mechanism; air pollution control and health issues.

**Fran Seballos** is a Research Officer at IDS specialising in climate change adaptation work. With 14 years of experience working in the field of climate change adaptation, environmental conservation and community-based decision-making, Fran's interests lie at the interface between human development and natural resource management. Her particular interests are around the impact of climate and disasters on social and ecological systems, the role of decentralised governance and participatory decision-making and understanding processes that influence change.

**Md Shamsuddoha** is one of the leading researchers on climate change in Bangladesh. He is the Chief Executive at Participatory Research and Development Initiatives (PRDI) and previously the former General Secretary of

Equity and Justice Working Group Bangladesh (EquityBd). He is familiar with the climate change negotiations of the UNFCCC, which he closely follows, especially in relation to adaptation and finance. Shamsuddoha writes on core climate change politics and diplomacy and has published high-profile reports.

**Alex Shankland** is a Fellow with the Power, Participation and Social Change Team at IDS, working on rights, democratisation and citizen-state engagement in health system reform, water and sanitation, local governance, protected area management and climate change policy, principally in Brazil and Portuguese-speaking Africa. His current research focuses on theories and practices of democratic representation and political participation, with particular reference to indigenous peoples and other marginalised minorities.

**Moshahida Sultana** is a lecturer of Economics at the Department of Accounting and Information Systems, University of Dhaka, and previously taught at the Department of Economics of BRAC University and Jahangirnagar University. She has researched in the area of environmental economics, globalisation, political economy and migration. Moshahida is currently the Secretary of the National Energy and Water Consumer Forum of Bangladesh (NEWCFB), and also regularly writes op-eds in leading daily newspapers in Bangladesh. Besides teaching, research, and writing she has provided consultancy services to the International Labour Organization (ILO), International Organization for Migration (IOM) and various NGOs in Bangladesh.

**Thomas Tanner** is a Research Fellow at IDS specialising in climate change adaptation and its links to poverty and development. He has been engaged for 15 years with environment and development issues as a researcher, practitioner, policymaker and negotiator on UN conventions and climate change and desertification. His work centres on the implications of climate change impacts and response strategies for poverty, vulnerability and social justice. Specific interests include tools for mainstreaming climate change into development cooperation, child-centred approaches to disaster risk reduction and adaptation, organisational responses to climate change, and the political economy of climate change initiatives.
